OUR PRICES

Terms: Net cash, no discounts.

Five hundred trees of any one kind and size at the thousand rate. For less than five hundred of one kind ask for retail price list.

No extra charge for boxes or packing. All orders shipped express unless otherwise specified.

### FALL PLANTING

Fall planting is successful on a type of soil that does not heave with the action of the frost in the spring and especially so if the trees are planted far enough in advance of the winter season so that the roots can get some anchorage before the winter starts.

In order that trees may get settled before the winter, we suggest that they be planted as soon after September first as is practical in your climate. If you are in doubt, place your order at once, and we will send the trees to you at the proper time.

We cannot emphasize too strongly the superior quality of 2-2 stock (two years in seed bed and two years in transplant bed). During the past five years we have had various experiences in planting 3-0 (three-year seedlings), 3-1 (three years in seed bed and one year in transplant bed), 3-2 and 2-3 trees. We have proven beyond a doubt that the most practical and most economical tree to plant is the 2-2 transplant. This is the only size we will use and guarantee in our contract planting work.
